Israel

DEFINITION

Protected areas in Israel
Protected areas (polygons and points)
Exclusive Economic Zone (EEZ)
PROTECTED AREAS

Protected areas designated under international conventions and agreements

BIODIVERSITY DESIGNATIONS

Biodiversity designations represent the sites or regions that have been identified as important for biodiversity conservation due to their biological uniqueness or the high threat that they face. A plethora of different approaches have been promoted by conservation organisations and researchers in order to guide decisions about where to invest in biodiversity.
These approaches use globally consistent criteria and available data in order to identify and classify sites. The designations themselves do not confer protected area status, but many of the sites identified may partly or fully overlap with a protected area designation on-ground.

**CONVENTIONS AND TREATIES**

Important conventions and multi-lateral agreements that relate to biodiversity and the environment.

| Convention on Biological Diversity (CBD) | Ratification |
| Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) | Ratification |
| Convention on the Conservation of Migratory Species of Wild Animals (CMS) | Party |
| International Convention for the Regulation of Whaling (ICRW) | Adherence |
| International Plant Protection Convention (IPPC) | Contracting party |
| International Convention for the Prevention of Pollution from Ships | I-II; III; V |
